

Product Data Sheet: Aluminium Ducting

Description

A semi rigid and lightweight flexible duct, is manufactured from corrosive resistant aluminium which provides excellent strength and flexibility, adaptable to any low to high pressure heating, ventilation and air conditioning system. Mainly is used to move air.

Applications

A wide range of HVAC applications. Mainly is used to move air, such as with air conditioning or heating systems, throughout a structure or building.

Benefits

Temperature Range

Up to 350 °C

Color

Natural Aluminium/White

Size

50mm - 650mm

Thickness

0.07mm - 0.12mm 1-Ply and 0.05mm - 0.08mm 2-Ply

Material

Medium Hard Aluminium Ducting.

Pressure Range

Single ply up to 30.
Double ply up to 38Pa
